

**INTEGRATIVE THINKING FOR COMPLEX FUTURES:
CREATING RESILIENCE IN HUMAN-NATURE SYSTEMS**

XVI International Conference of the Society for Human Ecology

Sept. 10-13, 2008

Huxley College of the Environment
Western Washington University
Bellingham, Washington, USA

Western Washington University's campus will provide a stimulating setting for Human Ecology's most important, integrative, interdisciplinary and personable gathering. And, the Cascade Mountains and the "Salish Sea" are beautiful in September!

Compelling keynote speakers, and many different themes to participate in, including:

Ecology in Thought and Action ~ Urban Human Ecology
New Directions in Human Ecology Education
Resilient Roads to Management: Processes and Challenges
Environmental Biography ~ Conservation Psychology
Adaptation ~ Integration ~ Feedback ~ Self-reliance
Interdisciplinary Environmental Program Design and Curriculum
Regional themes around resource and governance issues

Suggestions for tracks and sessions are welcome:
